→ In Company Card, remove delete button & add three dot & in that add option for delete & add Password like - Delete @ 123##

✓ From the database images not delete
✓ and when refresh the deleted Images display
✓ delete permission not given but it show not delete
✓ when we capture photos for another option another Company so that not update storage usage.

- In the search it
  do search 8 digit not
  full folder name. 12 Photo
  11.6 GB Storage

GLZ Plus VOAGE-L

- all admin & manager page show properly
- Check Photos delete option also, delete from storage/all from database, total-photos, total-storage, mb
- user delete from database, from used-storage
also able to login into database.
Code Pull
Check total photos & total storage.

→ before Photo 444
Storage → 222.15

GLZ Plus VOAGE-L

→ when build APP - flutter ... appbundle
- first check all api link - local to techstrota.com
- then versionCode change - 11

→ Company Profile / details
- Techstrota ...

GLZ Plus VOAGE-L

button & add
option for delete
Delete @ 123##

delete
Images display
but it show not delete
mother option
that not update storage usage.

6% - storage

- When Provide manager's created sub company it not display in admin
- In multi-company, In admin deshboard we Provide which user to access that only display inside admin page, not in manager
- sub inside sub has not Profer back.
- Also check for storage max limit in test user for testing
- share folder in opt not work.
- check for some folder with specific user.
- In this invoice System, add option that when year ends we Provide this system to which company so that year when ends about to end at that time give notification inside super admin for that Particular company.

Shared counters

- Tomorrow work :- check Profer for user Stats Service for display Profer total company, manager & all
- check for storage photos for admin & manager
for admin & manager
