ChatGPT 5.1

php

```
public function uploadToSharedFolder(Request $request, $folderId)
```

You have:

```
$request->validate([
    'files' => 'required|array',
    'files.*' => 'file|mimes:jpg,jpeg,png,mp4,pdf',
]);
```

php

```
Copy code
```

Copy code

So backend ALREADY allows PDF

But here is the REAL problem 🤔

In Flutter you send 2 lists:

+ Ask anything 0

ChatGPT can make mistakes. Check important info. See [Cookie Preferences](#).
