```dart
  7        class FolderService {
           Future<File?> pickAndSaveAvatar() async {
125          await prefs.setString('avatar_path', picked.path);
130          return File(picked.path);
131        }
132      return null;
133      }
134
135
136      void showCameraDisabledMessage(BuildContext context) {
137        ScaffoldMessenger.of(
138          context,
139        ).showSnackBar(const SnackBar(content: Text("Camera is disabled")));
140      }
141
142      void showScanDisabledMessage(BuildContext context) {
143        ScaffoldMessenger.of(
144          context,
145        ).showSnackBar(const SnackBar(content: Text("Scan is disabled")));
